- 8 ■ Retractable gate

### Dynamic Customer Service

Our Customer Care team offers 24x7 service. we lay great emphasis on exceptional aftersales service and provide spares .

Preventive maintenance and annual maintenance contracts for minimum own time ensuring durability and drive maximum ROI .

Our widespread service network assures response time to a maximum .

In rare case of any product failure, all you need to do is reach for the telephone.

### TOLLFREE

**1800 309 5166**

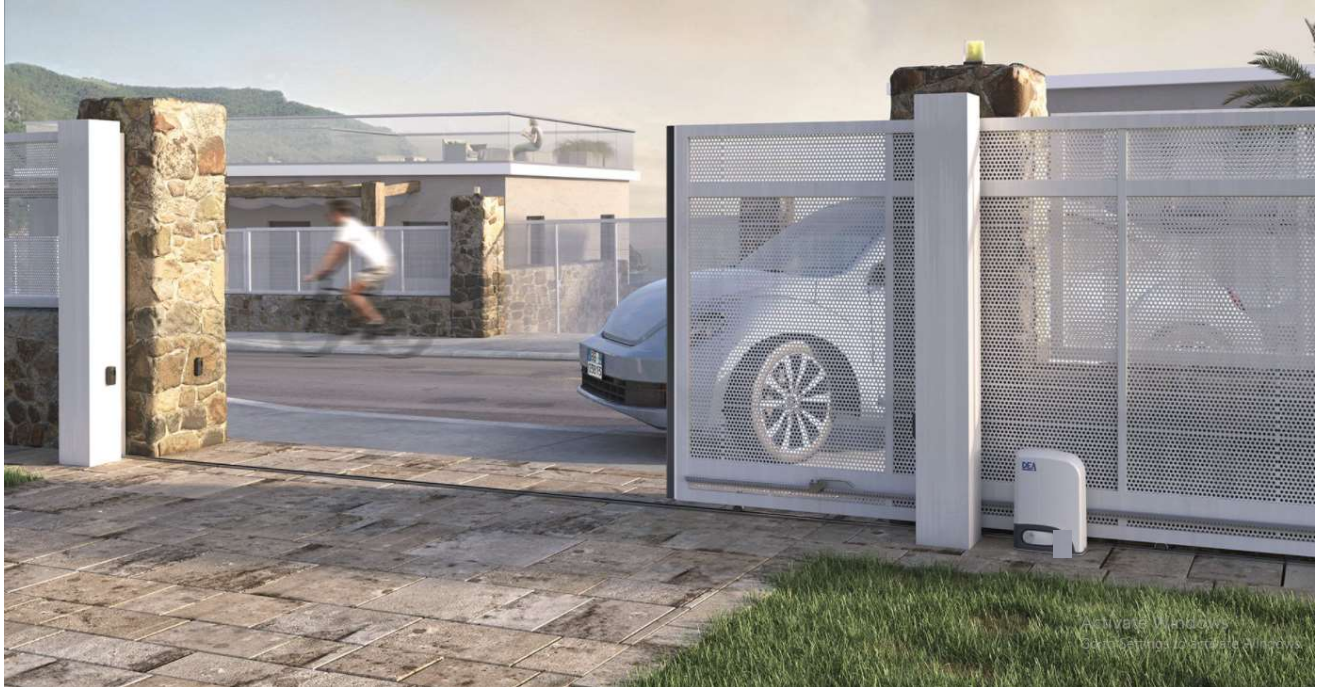

From Anywhere in India

One call and one of our highly trained service technicians will be on its way in a fully equipped customer service van with wide range of original spares.

# GATES

HIGH SPEED GATES AND HIGH PERFORMANCE GATES

With our sustained efforts, efficient & experience manpower, qualified & dedicated management, we have been able to supply Automatic Gate. Besides being manufactured and designed from highgrade raw material at vendor's end, this is provided with excelled control and operating mechanism. Owing to features like easy installation and low maintenance, the offered gate is exceptionally valued by our precious clients. This gate is available with us in various design and sizes at affordable price.

Rudhar has gave new technology through which you can access your any gate with the help of an application over the globe and eye-catching light facility on the drive of swing, sliding gate makes the product classic.

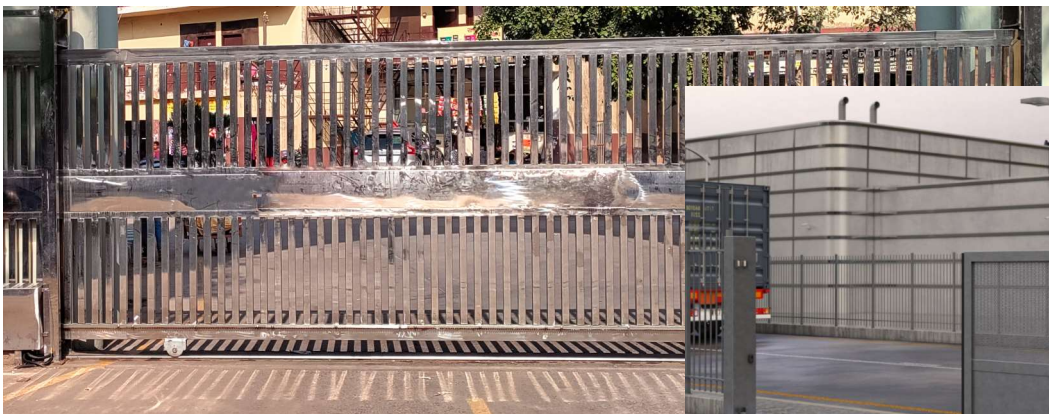

For residential usage

Available in  
230V and 24V

#fastasyoulike!

## 1. INDUSTRIAL SLIDING GATES

### HIGH PERFORMANCE INDUSTRIAL SLIDING GATES

Rudhar Gates designed and fabricated with special square or rectangular hollow sections, along with MS sheets and flats assembled by high quality welding.

Gates are aesthetically pleasing and the pre-tensioning of the gate leaf fabrication reduces the risk of bending.

Various range of models for gates weighing from 300 kg to 8000kg

Single phase electronic (230 V) & Three phase electronic (400 V) ensures maximum performances even under adverse conditions, thanks to greater dynamic Torque during the initial phase of operation.

Mechanical sensitivity detection causes the gate movement to stop if an obstacle is detected.

Hi-Tech electronic control unit permits operation time adjustment, partial opening, automatic closing, step by step control, stop safety, reverse safety etc

## 2. TELESOPIC SLIDING GATES

### HIGH PERFORMANCE TELESCOPIC GATES

**1**

#### TELESCOPING SLIDING GATES

TELESCOPING SLIDING GATES are ideal for sites where maximum opening is required and back space is restricted due to structural conditions.

**2**

#### MULTI LEAVES

The gates are Fabricated with multi leaves which makes it possible to achieve maximum clear opening as compared to conventional sliding gate.

**3**

#### ROBUST FABRICATION

These gates have extremely robust fabrication with high level of security making them suitable for most applications.

**4**

#### HIGHEST QUALITY STANDARD

All basic components of gates such as guide brackets, guide rollers, bottom rail, wheels, bearings, limit stop etc are of highest quality standards which ensures very good stability.

### 3. CANTILEVER SLIDING GATES

HIGH SPEED GATES AND HIGH PERFORMANCE GATES

CANTILEVER SLIDING GATES are also known as hanging gates or trackless gates as they use concealed mechanical bearings instead of wheels for its operation and the entire Gate is balanced on two hangers eliminating the need of a track.

They operate on concealed mechanical bearings instead of wheels which reduces the maintenance cost. The self-supporting cantilever gate is a collaboration of efficient manufacturing, design, and European technology.

1. The advantage of using cantilever sliding gates is that they have no ground track or foundation in the roadway hence ideal for road surfaces which are uneven or sloping and vehicle does not experience any bumps. Gate is not prone to getting blocked by leaves or dirt hence reduced maintenance.
2. Smooth, quiet operation due to no supports at the bottom of the gate.
3. Low maintenance due to self-lubricated wheels.

Toll Free No.  **1800 309 5166** From Anywhere in India

## 4. MOTORISED SWING GATES

HIGH SPEED GATES AND HIGH PERFORMANCE GATES

Model with articulated arms for gates not flawlessly vertical and/or with wide pillars, underground operators are also available for ornamental gates .

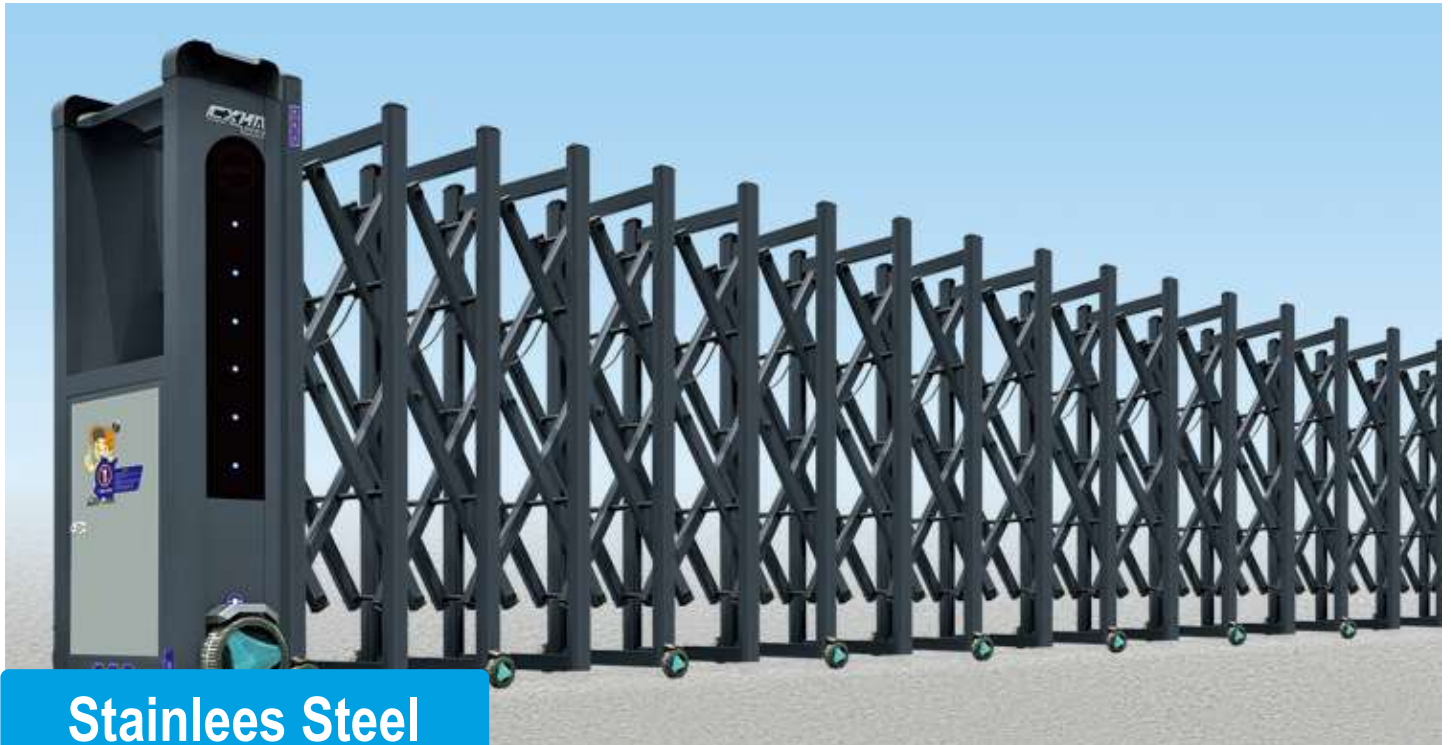

AUTOMATICS WINGS GATES by Rudhar Group are fabricated to provide safety, suitability and security against unauthorized invasion. Artistically fabricated these gates are FABRICATED WITH SQUARE PIPES encased in a pipe frame tailored to meet the client's necessities and are finished with spray painting.

Model with articulated arms for gates not flawlessly vertical and /or with wide pillars, underground operators are also available for ornamental gates.

Electro-mechanical actuators safeguard highly maintenance free and smooth operation.

## 5. RETRACTABLE GATES

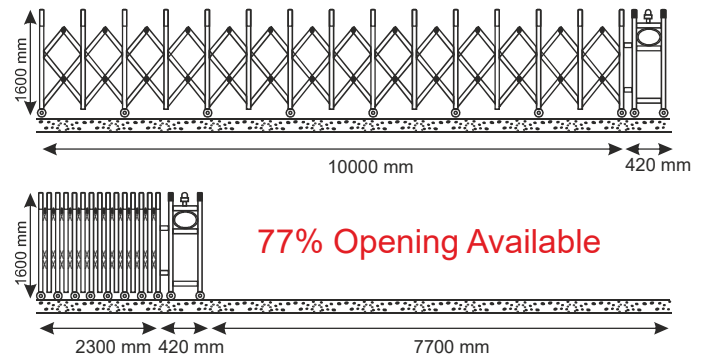

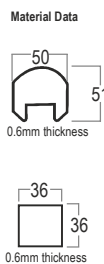

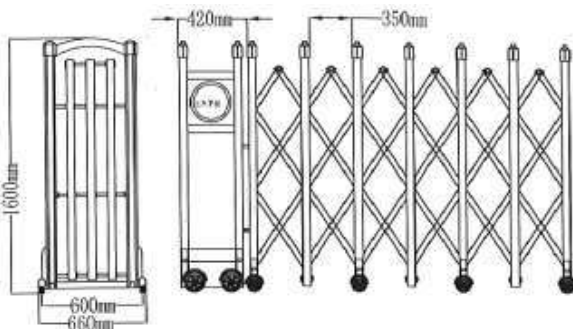

HIGH SPEED GATES AND HIGH PERFORMANCE GATES

### Stainless Steel

(Available in SS#201 & SS#304 Grades)

1. Eliminate the need to designate a sliding storage zone.
2. Any drift sand or stone accumulated due to wind and rain will not affect the normal operation of gates.
3. Equipped with anti-crash intelligent infrared double detectors enable gates to automatically retract when a person or object is detected ensuring safety.
4. Gates made from high strength aluminium alloy & mounted with sparkling silver, stainless steel, plastic plates.

Double Motor for Longer Gates  
with Heavy Duty Carbon Steel Gear
