## RUDHAR ROLLING SHUTTERS

Ruhar Rolling Shutters are ideal for situations where side room is at a premium and security is required. Our Rolling Shutters require very little headroom above the structural opening. They combine strength with elegance along with durability and are designed for both external and internal applications.

Rudhar Rolling Shutters are fabricated of interlocked Galvalume, Galvanised Insulated and Non Insulated, Stainless Steel, Patented Aluminium profiles and Bright Steel Bar Rolling Grills.

## Color Palette

Wide range of powder coating colours with excellent resistance to outdoor conditions and excellent colour retention that meets the requirements of all major European architectural standards.

\*Color palette is for reference only. Actual colors may differ.

\*\* More colors available on request.

# TYPES OF ROLLING SHUTTER

Are you concerned about the security of your industry, garage, commercial space, windows and doors and thinking about how to protect them from theft, vandalism, rain, fire or wind?

Are you concerned about the security of your industry, garage, commercial space, windows and doors and thinking about how to protect them from theft, vandalism, rain, fire or wind? Then there is the excellent option of roller blinds. Window or door composed of horizontal bars connected with hinges. You can easily raise it to open and lower it to close. Industrial roller shutters are constructed from a layer of double-walled aluminum that offers efficiency, functionality and durability while remaining strong and lightweight. For access to large doors,

## RANGE OF RUDHAR ROLLING SHUTTER

### Electrically - Operated Rolling Shutters

Electrical Type Rolling Shutters are operated by using a range of electrical actuators capable of operating shutters of all sizes. They are made up of self-braking worm gear with hollow shaft, integrated limit switches, integrated safety brakes with overload protection. Operationally, these shutters are relatively easy, hassle free and extremely safe and operate by integrating the control accessories like push-button, key selector or remote controls. During downtime, the option for manual operation is also available.

## INDUSTRIAL ROLLING SHUTTER

Rudhar Industrial Shutters are perfect for instances when lateral rooms are premium and safety is necessary. Over the structural opening our Rolling Shutters need very little headroom. They blend elegance with strength and longevity and are intended for exterior and interior uses.

Rudhar Rolling Shutters are made from inter locking Galvalume, Insulated and Non Isolated Galvanized, Stainless Steel, Aluminum.

Among the most popular and popular goods in key sectors, industrial rolling shutters are one of the most popular due to its low operating noise, long life, and beautiful appearance and characteristics.

## ALUMINIUM ROLLING SHUTTER

Aluminum roller shutters made from proprietary double-walled extruded aluminum profiles offer durability, efficiency and functionality while being lightweight and strong.

Aluminum roller shutters can be installed in areas where they would be exposed to everyday weather conditions as they are corrosion free.

Aluminumshutters has good insulation and are available in both insulated and non-insulated varieties.

They are simple to operate with a single push button and are made of high- quality raw materials for long-lastingperformance.

## GALVALUME ROLLING SHUTTER

Galvalume Rolling Shutters are ideally suited for most types of Industrial and Commercial applications. The aluminum – zinc alloy coating offers excellent corrosion resistance. It retains the sacrificial properties of zinc relative to steel while aluminum provides a tough film of aluminum oxide to increase barrierprotection. Galvalume Rolling Shutters continue to gain approval by specifiers, architects, building owners and many others due to its versatility, ease of use, aesthetics and long-term performance

## GALVANISED ROLLING SHUTTER

It is more important to protect your industrial property, valuable goods, equipment, machinery, and other expensive items from theft and damage. As a result, people use high-security and safety doors and windows to protect their official premises and garages. Doors and windows do not always last for a long time and can be easily broken or damaged by burglars.

As a result, using rolling shutters instead of standard doors and windows is the best way to provide top security for any industrial property, warehouse, or garage.

## ALUMINIUM PUFF INSULATED ROLLING SHUTTER

Aluminum puff insulated roller blinds are used in areas where the optimum ambient temperature needs to be constantly maintained and in areas where minimal maintenance and a beautiful appearance are required. Basically, the purpose of an insulated bean bag is to reduce heat transfer.

It can be used in various environments, e.g. In loading docks, factories, warehouses and anywhere where safety and thermal insulation are required. They can be used for both small and large openings, depending on the situation.

## GRILL ROLLING SHUTTER

These Grill rolling shutters can be used in showrooms, shopping malls, and in many more places as a display window.

This grill rolling shutter will provide you optimal protection without sacrificing visual access.

This grill rolling shutter will also help to circulate air, without any disturbance. Steel, steel punched shutters and grill rolling shutters in different patterns are available. Our shutters are made of high-grade metals that guarantee long-term functionality. The door's lower profile is fitted with extra stiffeners to give additional strength.

## POLYCARBONATE ROLLING SHUTTER

Polycarbonate Rolling Shutter, a one-of-a-kind option. It is a type of rolling shutter that was created with precision because it is made of reinforced steel rods and is installed between panels. These shutters will improve security even more because they are made of a combination of materials and are designed to be extremely robust with high resistance, making the shutters virtually unbreakable.

Polycarbonate is a thermoplastic substance, and it is sturdy and durable.

The key benefit of polycarbonate is 100% transparency plus moral strength.

## GEAR OPERATED ROLLING SHUTTER

Manual Gear operated type Rolling Shutters  
Very useful and effective for warehouse, malls and industrial premises we are capable of manufacture many designs and finest quality our working method like excellent workmanship, high quality material, perfect sizes and attractive designs also it's acquire low maintenance cost.

Roller shutters are a type of doors typically used for shops and businesses. The specification of the roller shutter should meet the customer's requirements. Here I try to give general information about roller shutters and their materials, methods of fastening and other details.
